<sup>1</sup>Basis:

P – Significant Portion of the Species’ Population is in BC

R – Significant Portion of the Species’ Range is in BC

L – Significant Portion of the Species’ Location Records are in BC. MOSESSES – location records are from herbarium records: New York Botanical Garden

([www.nybg.org/bsci/hcol/bryo](http://www.nybg.org/bsci/hcol/bryo)) and the University of British Columbia (herbarium.botany.ubc.ca). BUTTERFLIES – location records from Guppy and Shepherd (2001)

<sup>2</sup>Portion:

1 – 33% - 50% of Population/Range is in BC

2 – 50% - 75% of Population/Range is in BC

3 - > 75% of Population/Range is in BC

<sup>3</sup>Season:

W – Winter Population

B – Breeding Population

M – Migratory Population

Y – Year-round Population

<sup>4</sup>BC Status:

RED: Extirpated, Endangered, Threatened  
BLUE: Vulnerable  
YELLOW: Not-at-Risk  
NR: Not Ranked

<sup>5</sup>COSEWIC Status:  
SX: Extinct  
SH: Extirpated  
E: Endangered  
T: Threatened  
SC: Special Concern  
NAR: Not-at-Risk  
DD: Data Deficient  
NA: Not Yet Assessed
